593470 **Light time from full charge** 20 hrs

Charging source 12 or 230V

Light source six or 12 LEDs **Waterproof?** yes

Length 260mm

Scotlamp usually makes inspection lamps to order but with a background in supply to the marine industry, this lamp's main attraction is that it is designed to be waterproof. The illumination is good, although directional, and with a length of less than a foot, it feels small and light in use. The lack of hook is a letdown, but this is a flexible and compact unit that may prove useful in challenging circumstances.
